

Gandhinagar Institute of Technology

A Report on

“World Nature Conservation Day-Awareness Programme”
(28th July, 2022, Thursday)

Introduction:

Gandhinagar University celebrated “World Nature Conservation Day: Awareness Programme” organized by the National Service Scheme (NSS) on 28th July, 2022. People throughout the world observe World Nature Conservation Day to raise awareness regarding the value and relevance of natural resources. Natural resources have been severely degraded as a result of the rise in human population. Global warming, environmental pollution, extinction of flora and wildlife, and deforestation are just a few of the issues that people pose to the environment. To safeguard, maintain, and manage our natural resources sustainably, we should all take necessary action.

Objective:

The main objective of the event is to spread awareness among the people on saving the environment and to guide them about proper waste dismissal. Garbage mounds may always be seen in every other neighborhood. According to the report, 15.3 billion trees are felled annually. Additionally, it calculates that during the previous 12,000 years, 46 percent of the world’s trees have been cut down. Due to escalating global warming, stratospheric ozone has been declining globally since 1979, at a rate of between 4 and 6 percent per decade in mid-latitudes and between 10 and 12 percent per decade in higher southern latitudes. The event aims to raise awareness of the need of protecting the environment and natural resources in order to maintain global health.

Program Overview:

The National Service Scheme (NSS) organized “World Nature Conservation Day-Awareness Programme” at Moti Bhoyan Pagar Kendra Shala No.1, Moti Bhoyan on 28th July, 2022 under the guidance of Dr H N Shah Director, Gandhinagar University. The event started with a prayer and welcome speech for audience by NSS Volunteers. They delivered the speech on importance of nature, how to save the nature and impact of improper waste management and make aware to protect them in order to keep the world healthy. A group of NSS volunteers performed drama to spread awareness amongst the students about nature issues created by humans and various industrial factors and show how important is to save our nature. The event concluded with an interactive quiz with the students of the school and vote of thanks by NSS Student coordinator. Lastly, the event ended by chanting the NSS Anthem and National Anthem. School Students and NSS volunteers were enthusiastically engaged in this event and made it successful. The team is thankful to the trustees, Director, Management, NSS Coordinators, NSS volunteers and the admin staff for all the support and help to make the event grand and fruitful.
